Systems Integration

AGC Instruments has gathered extensive experience in designing and implementing analysis systems for over 20 years and we offer customised and turnkey solutions for our customers around the world. We aim to be your one stop solution provider and this is due to our ability to combine analytical expertise and know-how in sample conditioning, process technology and project management. This allows us to take you through the entire process from Consultation to Project Planning and Management right through to the delivery, commissioning and training of all your operating persons. There are many challenges which arise from the specification design through to installation and commissioning.

We believe that we are the right partner to meet these challenges that arise from sample treatment and conditioning to sample analysis. We can help you to fulfil all requirements no matter how big or small. At AGC Instruments, we aim to provide greater efficiency by offering a complete analytical measurement system which is integrated and meets your exacting requirements wherever in the world it is needed. We are responsible for every step of the project and through our Project Management team we are there for every part of the journey from start to finish. Our aim is to ensure your project finishes on time and within budget.

Projects

- Steam Cracking
- Sulfur Recovery Unit
- Ethylene
- HDPE
- LDPE
- PP
- EOEG
- MTBE
- 2-ethyl hexanol
- Butyl Rubber
- Atmospheric Vacuum Distillation
- Reforming
- FCC
- Hydrocracking / Hydrofining
- Delayed Coking
- Hydrogen Production
- Ethylene Cracking
- Phenol-acetone
- PO
- PDH
- OCU

Company Profile

AGC Instruments is a leading manufacturer of Gas Analysis Solutions to all users requiring a Quality Control or identification of their gas stream. We have over 50 years experience in providing our customers with their "Total Gas Analysis Solutions".

We work closely with all customers to ensure they obtain the analytical solution that meets their needs and a system that is easy to use and understand. All AGC distributors are extremely experienced and factory trained to the highest standards offering you a complete after sales support service.

The wide range of Detectors available can be customised to measure unique gas streams and we place an emphasis on the continuous development of our analytical solutions. Our worldwide reach with strategic partners ensures that you have peace of mind and after sales care that are important to your operations.

Products

Gas Chromatographs

- Safe Area & Hazardous Area (Zone 1 / Zone 2)
- 19" Rack or Wall Mounted Configurations
- Customised to Specification
- Unique Column & Detector Technology

Gas Analysers

- Total Hydrocarbons Analysis
- Binary Stream Analysis
- Trace Nitrogen Analysis

Aftersales Care

AGC Instruments are committed to providing and maintaining quality systems from customer liaison to technical knowledge through to System Design and Delivery. With each system manufactured under the auspices of ISO 9001:2015, guaranteed applications are achieved with the utmost quality. To coincide with this, we believe that our After Sales Support to the customer is one of the most important services we can offer. Each Distributor has been carefully selected and trained to ensure our customers receive the best possible service. Furthermore, online customer support and direct support are available to deliver a comprehensive support package.
